

## BEFORE YOUR APPOINTMENT

- **Isolate, practice social distancing and masking prior to surgery**
- **Complete your online registration at**  
<https://www.onemedicalpassport.com/?fid=117>
- **Call Ambulatory Care Center to make an appointment for COVID-19 testing.**
  - Collection must be done 3-4 days before surgery
  - “Drive through” process at center
  - A long swab will be inserted in your nose to the back of your nasal passage. Your eyes will likely water and it may be uncomfortable for a moment or two.
  - Results will be available in 42 – 72 hours. The center will call you.
- **See your primary care physician or specialists as directed by your surgeon. Also, get lab work as ordered.**
- **Ambulatory Care Center will call you 5 – 7 days before your procedure to perform a health screening.**
  - Results will be available in 42 – 72 hours. The center will call you.
- **Arrive for surgery with insurance and ID. We will do a final screening and temperature check. You will be asked to provide a cell phone number for your escort. No one is allowed in Ambulatory Care Center except for the patient**

## AFTER TESTING

It is the expectation of Ambulatory Care Center and your surgeon that you will follow the following protocols after your testing and prior to surgery:

### QUARANTINE at home

If you absolutely must leave your home (doctor's appointment), then you absolutely must:

### MASK

### PRACTICE SOCIAL DISTANCING

**If you have any questions, please do not hesitate to call our office at (856) 507-0800 or email [info@surgerycenternj.com](mailto:info@surgerycenternj.com)**
